PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing, developing, and deploying scalable MERN stack applications. Experienced in building secure REST APIs, real-time systems using WebSockets, AI-powered integrations with OpenAI and Claude APIs, and performance-optimized MongoDB architectures. Proven ability to deliver production-ready applications serving thousands of users while improving application performance, scalability, and maintainability.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material-UI (MUI), Responsive Design
Backend & APIs: Node.js, Express.js, REST API, RESTful API Design, Middleware, JWT Authentication, RBAC, WebSockets, Microservices
Database: MongoDB, MongoDB Atlas, PostgreSQL, Schema Design, Indexing, Aggregation Pipelines, Query Optimization, Performance Tuning
Maps & Location: Google Maps (Directions API), OpenStreetMap, Leaflet.js, Geolocation API
DevOps & Deployment: Docker, Git, GitHub, Linux, Bash, Netlify, Render, CI/CD Pipelines, Version Control
Testing & QA: Jest, Cypress, Playwright, Unit Testing, Integration Testing, End-to-End Testing, Test-Driven Development (TDD)
SDLC & Methodologies: Software Development Life Cycle (SDLC), Agile, Scrum, Sprint Planning, Code Review, Technical Documentation
Tools & AI: VS Code, Postman, OpenAI API, Claude AI, Cursor AI, Razorpay

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern
Coderead Academy

May 2026 – Present
Online

- Developed responsive MERN stack applications under the guidance of senior developers, contributing to production-ready features.
- Built RESTful APIs using Node.js, Express.js, and MongoDB following industry best practices.
- Implemented secure authentication and authorization using JWT and Role-Based Access Control (RBAC).
- Integrated the Razorpay payment gateway to enable secure online payment processing.
- Developed reusable React.js components using Redux Toolkit and Tailwind CSS to improve maintainability and UI consistency.
- Integrated frontend applications with backend APIs and managed application state using Redux Toolkit.
- Assisted in application testing, debugging, bug fixing, and performance optimization.
- Deployed frontend applications on Netlify and backend services on Render while supporting deployment and maintenance activities.
- Participated in Agile ceremonies, sprint planning, code reviews, technical documentation, and collaborative software development.
- Leveraged AI-assisted development tools such as Cursor, Claude, GitHub Copilot, and Antigravity AI to accelerate development, improve code quality, and enhance developer productivity.
- Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, Razorpay, JWT, Netlify, Render, Git, Cursor, Claude, GitHub Copilot, Antigravity AI

Full Stack Developer
DNASkeW Analytics Pvt Ltd

May 2023 – Jan 2026
Bengaluru , India

- Developed and maintained scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB across the complete Software Development Life Cycle (SDLC).
- Designed and implemented secure RESTful APIs with JWT authentication, Role-Based Access Control (RBAC), input validation, and error handling.
- Built AI-powered chatbot and intelligent recommendation features by integrating OpenAI and Claude APIs to enhance user engagement and workflow automation.
- Developed reusable and maintainable React.js components using Redux Toolkit for efficient state management and improved application scalability.

- Optimized MongoDB schemas, indexing strategies, and aggregation pipelines, improving query performance and reducing API response times.
- Improved frontend performance through lazy loading, code splitting, memoization, and rendering optimizations, resulting in faster page load times.
- Containerized applications using Docker and contributed to CI/CD deployment pipelines for streamlined releases.
- Managed end-to-end feature development, including requirement analysis, UI implementation, backend development, database design, testing, deployment, and production support.
- Led a development team for 6 months by assigning tasks, reviewing pull requests, mentoring junior developers, resolving technical challenges, and ensuring timely feature delivery.
- Collaborated with product managers, designers, QA engineers, and stakeholders in Agile/Scrum environments, participating in sprint planning, estimation, code reviews, debugging, and technical documentation.
- **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Docker, JWT, WebSockets, OpenAI API, Claude API, Tailwind CSS, Git

PROJECTS

Bike Rental Management System

Jun 2026 – Present

[GitHub](#) | [Live Demo](#)

- Designed and developed a complete online bike rental platform using the MERN stack with secure JWT authentication and RBAC.
- Integrated the Google Maps Directions API and OpenStreetMap to provide real-time route planning and navigation support.
- Implemented Leaflet.js for live location tracking and interactive map visualization of bike availability and rental zones.
- Integrated the Razorpay payment gateway for secure online rental payments and automated transaction processing.
- Built RESTful APIs with Node.js and Express.js and optimized MongoDB queries for booking validation and availability management.
- **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Razorpay, Google Maps API, OpenStreetMap, Leaflet.js, Netlify, Render, Git

ShoeShop – AI-Powered E-Commerce Platform

May 2026 – Jun 2026

[GitHub](#) | [Live Demo](#)

- Built a scalable AI-powered e-commerce platform using the MERN stack with a responsive UI and optimized user experience.
- Implemented secure JWT authentication and Role-Based Access Control (RBAC) with protected routes for customers and administrators.
- Integrated the Razorpay payment gateway with server-side payment verification and automated order processing.
- Built AI-powered product recommendation features using the OpenAI API to deliver personalized shopping experiences.
- Designed optimized MongoDB schemas and aggregation pipelines powering admin dashboards for inventory and order analytics.
- **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Razorpay, OpenAI API, Netlify, Render, Git

VNetPops – Real-Time Network Visualization Platform

May 2023 – Jan 2026

[GitHub](#)

- Developed a real-time network visualization platform using React.js, Node.js, Express.js, MongoDB, and WebSockets.
- Built a secure multi-tenant architecture with JWT authentication and Role-Based Access Control (RBAC).
- Implemented real-time WebSocket communication for live network topology updates.
- Developed AI-powered topology generation and an intelligent chatbot using Claude AI, with optimized MongoDB aggregation pipelines for analytics dashboards.
- Built automated end-to-end test suites with Playwright to validate critical application workflows.
- **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, WebSockets, JWT, Tailwind CSS, Claude AI, Playwright, Git

EDUCATION

Master of Computer Applications (MCA) | Thiruvalluvar College of Eng. and Tech.

2019 – 2021

CGPA: 8.4 / 10

Bachelor of Computer Applications (BCA) | Shanmuga Industries Arts and Science College

2016 – 2019

CGPA: 7.4 / 10
